

Single-mode ST to LC fiber optic patch cord

Overview

Single Mode Fiber Cables, Single-mode Duplex Cables, OS2 Patch OS2 LC to ST 9/125 Single-mode Duplex Fiber Optic Patch Cables, manufactured with the highest quality.

Key Takeaways

ST to LC single-mode fiber optic patch cords are high-quality cables designed for low-loss, high-speed network connections, typically in duplex format with 9/125µm OS2 fiber. Overview

An ST to LC single-mode fiber optic patch cord is a type of fiber jumper that connects devices with ST connectors to those with LC connectors. These cables are commonly used in telecommunications, data centers, and high-speed network environments where long-distance, low-loss transmission is required ().

Key Features

- Fiber Type: Single-mode (9/125µm), OS2 standard, optimized for long-distance transmission with minimal signal loss ().
- Connector Types: One end with ST connector (bayonet-style) and the other with LC connector (small form-factor, push-pull) ().
- Duplex Format: Most ST-LC patch cords are duplex, meaning they carry two fibers for bidirectional communication ().
- Performance: High-quality cords are tested for insertion loss (typically ≤ 0.20 dB) and return loss (≥ 50 dB) to ensure stable signal transmission ().

- **Ferrule Material:** Premium zirconia ceramic ferrules provide precise alignment and durability, supporting up to 500 mating cycles ().
- **Jacket Material:** Options include PVC (OFNR) or LSZH (Low Smoke Zero Halogen) for fire safety and minimal smoke emission in case of fire ().
- **Color Coding:** Single-mode patch cords usually have a yellow outer jacket for easy identification ().

Applications

- Connecting network switches, routers, and patch panels in data centers.
- Long-distance fiber-optic links in telecommunication networks.
- High-speed backbone connections where low insertion loss and high return loss are critical.

Purchasing Options

ST to LC single-mode patch cords are available in various lengths and configurations. Many suppliers provide individually tested cords with optical quality measurement reports to ensure compliance with industry standards (). Custom lengths and jacket types can also be ordered to suit specific network requirements.

Summary

ST to LC single-mode fiber optic patch cords are reliable, high-performance cables suitable for long-distance, high-speed network connections. They combine the robust ST connector with the compact LC connector, ensuring minimal signal loss, high return loss, and durability, making them ideal for professional networking and telecommunication applications ().
