

Specifications and Models of Real Estate Distribution Boxes

Overview

This document provides specifications for various distribution boxes including dimensions, mounting sizes, and number of ways.

Key Takeaways

Distribution boxes come in various models and specifications, including low-voltage switchgear, plastic, and precast concrete types, designed for residential, commercial, and industrial applications. Types and Models1.

Low-

Voltage Fixed Switchgear GGD Series: Used in substations and power plants; AC 50Hz, rated voltage 380V, high breaking capacity, stable performance, and novel structure.

GD

H Series: Similar to GGD, with manufacturer-specific parameters.

PG

L Series: Widely used for stable power supply in various locations, low-voltage fixed switchgear. 2.

Low-

Voltage Withdrawable Switchgear GCK Series: Composed of power distribution center cabinets and motor control centers; AC 60Hz, working voltage ~660V; suitable for motor control and lighting equipment.

GC

S Series: AC 50Hz, rated voltage 400V; used in power plants, oil facilities, high-rise buildings.

MN

S Series: Compact, stable, suitable for small power plants, industrial enterprises, buildings, and hotels. 3.

Plastic Distribution Boxes

Made from robust polypropylene, resistant to rust and corrosion. Available in 4-hole to 10-hole configurations, with lockable pedestrian-rated covers. Can be extended with Polylok risers for extra height.

Options include uncut or precut holes (2", 3", 4") and compatibility with grates and covers. 4.

Precast Concrete Distribution Boxes

Sizes range from 3 outlets to 14 outlets, suitable for underground or landscaped installations. Durable and easy to install, often used in residential and commercial drainage systems. 5.

Ex9XG Series Plastic Distribution Boxes Waterproof, dustproof, IP65 rated, UV resistant, withstands wire temperatures up to 650°C. Gland holes customizable for installation while maintaining IP integrity. Suitable for construction sites, outdoor charging stations, parking lots, gardens, bathrooms, and other areas requiring electrical distribution.

Key Specifications to Consider

Voltage and Frequency: AC 50Hz or 60Hz, rated voltages from 380V to 660V depending on model.

Number of Ways/

Outlets: Ranges from 1-way to 36-ways for switchgear; 3 to 14 outlets for precast boxes; 4 to 10 holes for plastic boxes. Material: Steel for switchgear, polypropylene for plastic boxes, concrete for precast boxes. Protection: IP65 for waterproof and dustproof models; lockable covers for security.

Installation Features: Mounting sizes, riser compatibility, customizable gland holes, and easy access for maintenance. These specifications allow selection of the appropriate distribution box based on application, environment, and electrical load requirements, ensuring safety, durability, and compliance with installation standards.
