

Stainless Steel Tray and Cable Tray Custom Manufacturer

Overview

Leading SS cable tray manufacturer providing high-quality stainless steel cable management systems for industrial and commercial applications.

Key Takeaways

Several manufacturers offer custom stainless steel cable trays, including JLH Electric, TSA Industries, Electrix, and Armorduct Systems, providing bespoke solutions for industrial and construction applications. Leading Manufacturers and Their OfferingsJLH Electric specializes in stainless steel wire mesh cable trays, also known as cable baskets. Their trays are made from high-quality stainless steel 304 or 316, offering excellent corrosion resistance and strength while remaining lightweight.

They provide custom sizes, lengths, and configurations, including curves, slopes, and tees, suitable for indoor and outdoor installations.

JL

H trays allow natural ventilation, reducing heat accumulation and protecting cables, and they offer OEM/ODM services for fully tailored solutions.

TS

A Industries manufactures robust stainless steel cable trays for construction and industrial projects. Their products are made from austenitic 304L or 316L stainless steel, ensuring corrosion resistance and long service life.

TS

A provides custom-made trays designed to optimize cable management, facilitate installation, and comply with hygiene and safety standards. They also offer rapid dispatch and technical support for project-specific requirements. Electrix International offers a Custom Shop for bespoke enclosures, trunking, and cable trays.

Using advanced CAD software and fiber laser cutting technology, they can produce non-standard sized trays, basket trays cut to length, and full trunking kits ready for plug-and-play installation. Customers can submit CAD models, and Electrix will develop a complete kit of components tailored to exact specifications. Armorduct Systems in the UK provides a wide range of steel cable management systems, including trays, baskets, and trunking.

They offer bespoke cable management solutions designed and manufactured in-house, catering to both standard and custom requirements for industrial and commercial projects.

Key Considerations for Custom Cable Trays

Material Selection: Stainless steel 304 or 316 is preferred for corrosion resistance and durability. **Design Flexibility:** Custom trays can include bends, slopes, tees, and variable lengths to fit complex installations. **Ventilation and Heat Management:** Wire mesh or open designs help dissipate heat and maintain cable performance.

Compliance and Certification: Ensure trays meet relevant safety, hygiene, and electrical standards. **Technical Support:** Manufacturers offering design consultation, CAD modeling, and installation guidance can reduce project time and errors. These manufacturers provide comprehensive solutions for custom stainless steel cable trays, suitable for construction, IT, industrial, and telecommunication projects, ensuring durability, safety, and efficient cable management.
