

Type 86 Four-Hole Fiber Optic Panel

Overview

Type 86 fiber optic panel_1688 wholesale purchasing guideType 86 fiber optic panel: why it is the first choice for engineers and decoration teams?

Type 86.

Key Takeaways

The Type 86 Four-Hole Fiber Optic Panel is a standardized, modular panel designed for SC/LC fiber interfaces, supporting both surface-mounted and concealed installations for home, office, and enterprise networks.

Overview and Design

The Type 86 fiber optic panel is a compact, standardized solution compatible with national 86 boxes, making it ideal for FTTR (Fiber to the Room) all-optical networking and smart home weak current boxes. The four-hole design allows for up to four fiber ports, supporting SC or LC adapters, and can accommodate dual-port configurations for flexible network expansion. Panels are crafted with high-precision molds, flame-retardant materials, and reinforced metal structures, ensuring durability and long-term stability.

Installation and Compatibility

Installation Types: Supports both surface-mounted and concealed installations, allowing integration into walls, cabinets, or standard 86-type faceplates. **Interface Compatibility:** Works with SC/APC, SC/UPC, and LC connectors, providing high compatibility with mainstream fiber optic systems. **Modular Design:** The panel's modular interface simplifies wiring, maintenance, and future upgrades, reducing installation time and material usage.

Advantages

Fast Installation: Optimized cable threading holes and outlet covers streamline setup.

Cost-

Effective: Direct factory sourcing and competitive pricing make it suitable for large-scale projects or budget-conscious deployments. **Durable and Stable:** Reinforced structure and precise manufacturing reduce signal loss and interface disconnections, ensuring network reliability. **Versatile Applications:** Suitable for home networks, office expansions, smart parks, and enterprise fiber deployments.

Sourcing and Market Availability

Type 86 panels are widely available from manufacturers in Shenzhen and Yueqing, with options ranging from entry-level models to reinforced high-end versions. Bulk orders can be fulfilled quickly, often within 48 hours, making them suitable for fast-paced engineering projects. Pricing varies depending on configuration, with basic models starting at very low unit costs, while reinforced versions offer enhanced durability.

Summary

The Type 86 Four-Hole Fiber Optic Panel is a reliable, modular, and cost-effective solution for modern fiber optic networks. Its standardized design, compatibility with SC/LC interfaces, and flexible installation options make it ideal for both residential and commercial applications, ensuring efficient wiring, network stability, and long-term usability.
