

# What are some EU-branded galvanized cable trays

## Overview

Cable trays for industrial and marine use. Includes distribution trays, cable routes and NATO-type models.

## Key Takeaways

European manufacturers offer high-quality galvanized cable trays suitable for industrial, commercial, and infrastructure applications, compliant with EN standards. Leading EU Manufacturers

Spina Group (Italy) produces a wide range of galvanized cable trays, including ladder, perforated, and closed-bottom types. Their hot-dip galvanized (HDG) trays ensure corrosion resistance and long-term durability, suitable for indoor and outdoor industrial environments. They also provide custom sizes, compatibility with Unistrut systems, and accessories like elbows, junctions, and covers for complete cable protection, all compliant with EN and UL standards. Eurostrut (Europe-wide) offers hot-dip galvanized steel and stainless steel trays, designed for strong, durable, and flexible cable management. Their trays are suitable for industrial and marine applications, with open or perforated designs to reduce overheating and facilitate maintenance. voestalpine Metsec (UK) manufactures cable trays in mild steel pre-galvanized or hot-dip galvanized finishes, as well as stainless steel on demand. Their systems conform to BS EN 61537, covering cable tray and ladder systems, and include a full range of accessories for bends, tees, and custom installations. OBO Bettermann (Portugal/Germany) provides corrosion-resistant galvanized trays and fastening technologies, designed for industrial and commercial applications, ensuring compliance with European safety and quality standards.

### Key Features of Galvanized Cable Trays

- **Material and Corrosion Resistance:** Hot-dip galvanized steel provides excellent protection against rust and environmental degradation, making it suitable for harsh industrial or outdoor conditions.
- **Types:** Ladder trays, perforated trays, closed-bottom trays, and wire mesh trays are available to meet different load, ventilation, and cable protection requirements.
- **Compliance:** Most EU manufacturers adhere to EN 61537 and other relevant European standards, ensuring safety, durability, and compatibility with industrial installations.
- **Customization:** Manufacturers offer custom widths, lengths, and accessories to accommodate specific project requirements.
- **Installation:** Modular designs with integral connectors, grounding provisions, and optional covers facilitate fast, safe, and flexible installation.

### Applications

Galvanized cable trays from EU manufacturers are widely used in:

- Industrial plants and factories
- Energy and power generation facilities
- Infrastructure projects, including transport and water treatment
- Marine and offshore installations These trays provide robust cable management solutions, ensuring long-term performance, safety, and compliance with European regulations .
