

What are the different sizes and models of pigtail fiber

Overview

Fiber Optic Pigtails are manufactured in a variety of types to cater to diverse network requirements and applications.

Key Takeaways

Yes, SC fiber optic pigtails come in different sizes and configurations, including variations in fiber type, core count, and physical dimensions. Fiber Type and Core Count

SC pigtails are available in single-mode and multi-mode fibers, with core diameters typically of 9 μm for single-mode and 50–62.5 μm for multi-mode fibers . They can also be single-core, dual-core, or multi-core, with common multi-core configurations including 4, 6, 8, 12, 24, 48, and 72 fibers . Multi-fiber pigtails are often color-coded to simplify identification and splicing.

Connector Variants

SC pigtails use a push-pull latching mechanism and are available in different polish types:

- PC (Physical Contact): Standard flat end face for general use.
- UPC (Ultra Physical Contact): Lower insertion loss for high-performance applications.

- APC (Angled Physical Contact): Angled end face to reduce back reflection, ideal for CATV and FTTH systems .

Physical Dimensions and Jacket Types

SC pigtails vary in buffer and jacket sizes. Common buffered diameters include 900 µm for indoor applications, while armored or ruggedized jackets are used for outdoor or industrial environments . Standard lengths are often 1.5 meters, but custom lengths are available to reduce splicing waste and fit specific installations .

Applications

Different sizes and configurations of SC pigtails are used in:

- Telecommunications networks
- Data centers
- FTTH (Fiber to the Home) deployments
- Patch panels and splice enclosures

Summary

When selecting SC pigtails, consider:

- Fiber type: single-mode vs. multi-mode
 - Core count: single, dual, or multi-fiber
 - Connector polish: PC, UPC, or APC
 - Buffer/jacket type: indoor, outdoor, or armored
 - Length: standard or custom
- Choosing the right SC pigtail ensures optimal network performance, low insertion loss, and compatibility with your existing fiber infrastructure .
