

What does ADSS24-core optical cable mean

- ✓ Slow Axis Aligned (0°) - for standard sensing applications
- ✓ Fast Axis Aligned (90°) - for special modulation applications
- ✓ 45° Axis Aligned - for depolarizer applications

Overview

Introducing the ADSS Cable 24 Core ADSS (All-Dielectric Self-Supporting) cable is a specialized type of fiber optic cable designed for aerial installation.

Key Takeaways

The AdSS 24-core optical cable is an all-dielectric, self-supporting fiber optic cable designed for aerial installations, featuring 24 single-mode fibers in a loose tube structure with high tensile strength and water-blocking protection.

The 24-core ADSS (All-Dielectric Self-Supporting) optical cable is widely used in medium to long-distance telecom and power utility networks. It is designed to be installed without metallic components, making it ideal for high-voltage environments. The cable supports its own weight, eliminating the need for lashing or messenger wires, and is suitable for installation on overhead utility poles or transmission lines.

Construction and Materials

- Fiber Type: Single-mode ITU-T G.652.D fibers, arranged in loose tubes, typically 6 fibers per tube.
- Loose Tube: Made of high-modulus plastic (PBT), filled with water-blocking gel or compound to prevent moisture ingress.
- Reinforcement: Two layers of aramid yarn (Kevlar) twisted bidirectionally for tensile strength and durability.
- Outer Sheath: Polyethylene (PE) for standard voltage applications or anti-tracking (AT) sheath for high-voltage lines above 110 kV.

- Color Coding: Fibers are color-coded for identification, with black tracers used for fibers 13–24 when necessary .

Mechanical and Environmental Properties

- Self-Supporting Span: Can exceed 1000 meters depending on design and environmental conditions .
- Tensile Strength: Enhanced by precise aramid application and controlled stranding pitch, ensuring excellent performance under wind, ice, and temperature variations .
- Water Resistance: Loose tubes and filling compounds prevent water ingress; cable ends are capped during shipping .
- Temperature and Environmental Tolerance: Designed for outdoor aerial applications, resistant to UV, abrasion, and fungus .

Applications

- Telecom Networks: Ideal for pole-to-building, town-to-town, and campus network loops .
- Power Utility Networks: Can be installed on live high-voltage transmission lines (35 kV, 110 kV, 220 kV) without risk of electrical conduction .
- Installation: Single-pass aerial installation without additional support wires; suitable for both new and existing lines .

Variations and Considerations

- Fiber Count: While this model has 24 cores, ADSS cables can range from 6 to 144 fibers .
- Sheath Type: PE for standard applications, AT for high-voltage or anti-tracking requirements .
- Span Length and Mechanical Design: Longer spans require additional aramid reinforcement, affecting cost and tensile performance .
- Bending Radius: G.657A1 fibers offer improved bending performance compared to standard G.652.D fibers, useful in tight installations . The AdSS 24-core optical cable provides a reliable, high-performance solution for aerial fiber deployment in both telecom and power utility networks, combining self-supporting design, water-blocking protection, and high tensile strength for long-term outdoor use .

Introducing the ADSS Cable 24 Core

ADSS (All-Dielectric Self-Supporting) cable is a specialized type of fiber optic cable designed for aerial installation.

24 Cores ADSS Fiber Optic Cable Price & Datasheet

ADSS cable is a type of fiber optic cable that is strong enough to

Technical Specifications

This specification covers the construction all dielectric self-supporting Optical Fiber Cable (ADSS) properties for outdoor application.

12/24/48 Core ADSS Optical Fiber Cable

ADSS (All-Dielectric Self-Supporting) fiber optic cable is a type of aerial cable specially designed for installation along overhead

24 Core ADSS Optical Fiber Cable

What is a 24-core ADSS Optical Fiber Cable? The design of the 24 core ADSS cable relies on 24 single-mode optical fibers encased

24-Core ADSS Optical Fiber Cable with OWIRE Solutions

The term “24-core adss optical fiber cable” refers to a specialized fiber optic cable containing 24 individual optical

ADSS Fiber Optic Cable | All-Dielectric Self-Supporting Aerial Cable ...

AFL-ADSS (All-Dielectric Self-Supporting) fiber optic cable is a non-metallic cable which supports its own weight without the use of

24 Core ADSS Cable: High-Performance Fiber Optic Solution for

The 24 core ADSS cable represents a cutting-edge solution in fiber optic communication infrastructure. This All-Dielectric Self

24-core ADSS Optical Fiber Cable

The 24-core ADSS Optical Fiber Cable is a self-supporting solution designed for telecommunications networks. With its ability to

GL FIBER 24 Core ADSS Fiber Optic Cable, G652D, 120m Span

ADSS (All Dielectric Self-Supporting) cables are designed for Overhead self-supporting applications at short, medium and long span

ADSS Fiber Optic Cable Specifications Explained

Explore the complete specifications of ADSS fiber optic cables, including structure details,

What is ADSS Fiber Cable?

What is ADSS Cable? ADSS (All-Dielectric Self-Supporting) cable is a specialized type of

Introducing the ADSS Cable 24 Core

The ADSS Cable 24 Core stands out as a premier solution, combining cutting-edge design with unmatched durability

ADSS Fiber Optic Cable: What You Should Know

ADSS (All-dielectric Self-supporting) optical fibre cable is a type of self-supporting aerial fiber optic cable designed for

What is an All-Dielectric Self-Supporting (ADSS) Fiber ...

Understanding ADSS Fiber Optic Cables So, what does ADSS mean in fiber? ADSS stands for All

How to Select the Right ADSS Cable for Your Project | ADSS Fiber Cable ...

Learn how to select the right ADSS fiber optic cable based on span length, voltage level, and weather conditions. This

What Is ADSS Cable? Complete Guide to Self-Supporting Fiber Optic Cable

For utilities operating in high-voltage environments, ADSS fiber optic cable offers a practical solution for establishing

What is ADSS Fiber Optic Cable?

ADSS fiber cable is mainly used on power pole frames, so it is required to have high mechanical strength

24-core ADSS Optical Fiber Cable

The 24-core ADSS Optical Fiber Cable is a self-supporting solution designed for telecommunications networks. With its ability to

Technical Specifications

The optical fiber cable contains 24 cores (6cores/tube) single mode ITU-T G.652.D fiber. The optical fiber cable shall be according to

What is ADSS Fiber Optic Cable? Structure,... | ABPTEL

In this article, I want to share a complete view of ADSS fiber optic cables based on my real

The Most Complete Guide to ADSS Cable

Are you in search of the optimal fiber optic cable for your network? Well! It is critical to choose the right cable so that

OPTICAL FIBER CABLE SPECIFICATION (ADSS-Span= 100m)

1. General 1.1 The specification covers the construction and properties of single mode optical fiber cable.

ADSS fiber optic cable price | A Complete Buyer's Guide

Discover the latest ADSS fiber optic cable price for various spans and core counts. Get competitive quotes, understand cost factors,

What is ADSS Cable? The Complete Guide to Aerial Fiber (2026)

What is ADSS Cable? We explain the "All-Dielectric Self-Supporting" technology, the difference between PE and AT jackets, and

The structure and characteristics of ADSS optical cables

ADSS (All-Dielectric Self-Supporting) optical cables are a type of fiber optic cable designed for aerial installations

What is ADSS Cable? Structure, Advantages, Installation

ADSS cable (All-Dielectric Self-Supporting cable) is a widely used aerial fiber optic solution for power transmission

What Is ADSS Fiber Optic Cable?

What Is ADSS Cable? ADSS cable is a type of fiber optic cable that is strong enough to support itself between

How to Choose ADSS Fiber Cable by Span, Core Count, and

Learn how to choose ADSS fiber cable by span length, core count, and installation method. This engineering guide
