

What is the price of a fiber optic fusion splice box

Overview

Amazon.com: Fiber Splice Enclosure Price and other details may vary based on product size and color. Fiber Optic Wall Mount Box with LC Couplers for Single.

Key Takeaways

Fiber optic fusion splice boxes typically range from \$0.25 to \$36 per unit, depending on capacity, material, and features. Fiber optic fusion splice boxes are available in a variety of configurations for different network needs.

Wholesale prices start as low as \$0.25 per unit for basic models and can go up to \$36 per unit for more advanced enclosures suitable for FTTX networks. Retail options, such as wall-mount or rack-mount enclosures, often include features like swing-out trays, multiple fiber counts, and durable materials like aluminum or engineering plastics.

Factors Affecting Price

Capacity: Boxes can support from 12 to 72 fibers or more. Higher fiber counts generally increase the price. **Material:** ABS plastic, aluminum, or steel enclosures vary in durability and cost.

Outdoor-rated boxes with IP65 protection are typically more expensive. **Design:** Wall-mount vs. rack-mount, presence of swing-out trays, and integrated PLC splitters can influence pricing. **Application:** Boxes designed for permanent fusion splicing without adapter slots are often priced higher due to specialized design and low-loss performance.

Typical Use Cases

Residential and commercial FTTH networks: Compact wall-mount boxes for 12–24 fibers. Data centers and telecom facilities: Rack-mount enclosures with higher fiber counts and modular trays. Industrial or outdoor environments: IP65-rated boxes with UV and impact resistance.

For bulk purchases, prices can be lower per unit, especially when ordering directly from suppliers or manufacturers. Retail platforms like Amazon also offer a range of enclosures with varying capacities and features, which may slightly increase the cost due to shipping and retail markup. In summary, expect to pay between \$0.

25 and \$36 per fiber optic fusion splice box, with the final price depending on fiber capacity, material, design, and intended application.
