Which company makes good long-span cable trays

Overview

Supporting Heavy Power Cables in Long-Span InstallationsLearn how to effectively support heavy power cables in long-span installations. Discover load distr.

Key Takeaways

For long-span cable trays, leading manufacturers like Atkore International, Legrand, and OBO Bettermann are highly recommended for their durability, customization options, and global support.

Recommended Manufacturers

Atkore International is recognized for its extensive range of cable management systems, including industrial-grade cable trays suitable for long spans. They offer galvanized, stainless steel, and custom solutions, ensuring high load capacity and corrosion resistance, making them ideal for heavy-duty industrial and commercial installations. Legrand provides high-quality cable trays and infrastructure products, with a focus on electrical and digital building systems.

Their products are known for durability, ease of installation, and compliance with international standards, making them suitable for long-span applications.

OB

O Bettermann has over a century of experience in cable support systems. They offer cable trays, ladders, and mesh trays designed to withstand mechanical loads and environmental stress. Their systems are modular, allowing for long-span installations with secure cable routing and professional technical support.

Types of Cable Trays for Long Spans

Ladder Cable Trays are the most suitable for long spans, typically ranging from 10 to 24 feet. Their open rung-and-rail design allows for superior airflow, reduces heat buildup, and supports heavy power cables over extended distances. Wire Mesh Trays are lightweight and flexible, ideal for data centers or installations requiring frequent modifications.

While not as heavy-duty as ladder trays, they can be used for medium-span applications with proper support. Solid Bottom Trays provide maximum protection against dust, debris, and environmental exposure. They are suitable for outdoor or corrosive environments but may require additional support for very long spans.

Key Considerations

Load Capacity: Ensure the tray can support the weight of all cables over the intended span. Ladder trays generally offer the highest capacity for long spans. Material and Corrosion Resistance: Galvanized or stainless steel trays are preferred for durability and outdoor use.

Customization and Support: Choose manufacturers that offer tailored solutions, technical guidance, and installation support for complex or long-span projects. Compliance: Verify that the trays meet relevant standards such as DIN EN 61537 for cable support systems. For large-scale or industrial projects, Atkore International, Legrand, and OBO Bettermann are among the best choices due to their proven reliability, product variety, and global availability.

Selecting ladder-style trays from these manufacturers ensures safe, efficient, and long-lasting cable management for long-span installations.
